IU Southeast Graduating Student Survey: Academic Affairs Report

BACKGROUND

The Indiana University Southeast Graduating Student Survey is administered to students when they apply for graduation and collects data regarding post-graduation plans, employment and income, applied learning experiences,

factors influencing student satisfaction with their experiences

Individual question response rate varies. We include partial responses in the report and, unless otherwise indicated, non-respondents are excluded in tabled data counts and percentages.

at IU Southeast, diversity and culture, campus safety and self-perceived levels of abilities. This multi-year report is intended to provide information regarding how these data have changed from year to year and to support decision-making that facilitate change in response to the dynamic needs of the student population.

EMPLOYMENT

Thirty-three percent of all respondents relied on family or friends in obtaining their current positions, followed by 20% of the respondents who utilized the internet or a website. While this remained consistent when looking at the undergraduate group, networking was the most popular method of obtaining a position for the graduate group, followed by faculty and staff.

APPLIED LEARNING EXPERIENCES

Participation in applied learning experiences has decreased in seven of the nine recognized experiences. The only applied learning experiences that saw small increases were submissions to the Undergraduate Research Journal and the Graduate Research Journal.

Table 4: Applied Learning Experiences:

Please note that respondents could choose multiple answers.

When analyzed further, the collected data shows that graduates' participation in applied learning experiences has decreased in six of the nine recognized experiences, with four experiences seeing a decrease in participation of 10% or greater: completion of a practicum experience, participation in other professional conferences, completion of an internship, and completion of a clinical experience. On the other hand, student teaching and submissions to the Graduate Research Journal saw a 1-2% increase in participation.

As for undergraduates, participation showed a decrease in eight of the nine areas, with six of the areas seeing a decrease of 5% or greater: completion of a practicum experience, participation in other professional conferences, completion of an internship, completion of a field experience, completion of a clinical experience, and participation in the IU Southeast conference. The only area that saw a small increase (+1%) in participation was submissions to the Undergraduate Research Journal.
