Carbonneau, T. A. (Artist), Art - Art Works in Publication, "The Moving Image as Public Art: Sidewalk Spectators and Modes of Enchantment. Palgrave Macmillan, 2021."  
<https://www.amazon.com/Moving-Image-Public-Art-Experimental/dp/3030659038>,  
My work is discussed and shown on pages 169-171.

This book maps the presence of moving images within the field of public art through encounters with passersby. It argues that far from mere distraction or spectacle, moving images can produce moments of enchantment that can renew, intensify, or challenge our everyday engagement with public space and each other. These artworks also offer frameworks for understanding how moving images operate in public space—how they move viewers and reconfigure the site of the screen. Each chapter explores a mode of address that examines how artists and curators leverage the moving image's attentional power to engage audiences, create spaces, make place, and challenge assumptions. This book also examines the difficulties and compromises that arise when using urban screens for public art.

On April 22, 2022, I presented with Dr. Nancy DeJoy (Michigan State University) and her students at the Michigan State Museum's "Night at the Museum" program. Our hands-on STEAM presentation showcased Michigan-based species that had recently come off the "Endangered Species" list. Her students worked with us to help 150+ people make prints and poems about these species. Our presentation tied with the shark presentation as most popular. The people who participated in our hands-on experience made prints and poems, as well as learning about the process of delisting species and what they can do in their own neighborhoods and homes in order to promote sustainability and environmental renewal.
